

How to make natural female hairline transplantation

KIM Eun young, M.D.

MOJELIM plastic surgery clinic

■ Abstract

Factor of natural hairline transplantation

1. Thickness of donor hair
2. Appropriate design
 - 0.8:1:1 ~ 1:1:1
 - Average center = 6.5 ~ 7.5 cm
 - Eyebrow ~ Temporal peak = 2.5 ~ 3.5 cm
 - irregular irregularity
3. Gradiate density and volume control
4. Neat regular placement
5. Degree of frizziness
6. Keep acute angle of sideburn, TP
7. Dense packing around the part area
8. Gap of thickness between donor and recipient area
